

Things to check before you submit your assignment:

- Do you have a .git directory in your submission?
- Do you have at least 7 commits in your git repository?
- Have you checked that all of the libraries you are using are in the allowed list on Moodle? If its not on the list or you don't have confirmation from me you are not allowed to use it.
- Have you included your requirements.txt that includes every library your application needs to run?
- Have you removed your env/ directory from your submission?
- Have you removed your service account .json file from your submission?
- Have you kept your firebase authentication code in firebase-login.js?
- Have you kept and used local_constants.py (only applies to final assignment)?
- Have you run and tested your code with an empty firestore with no collections or documents?
- Have you run and tested your code with an empty cloud storage bucket (only applies to final assignment)?
- Have you written your documentation?
- Have you checked that your code compiles and runs?
- Is your code submission in a .zip, .rar, .7z, ..tar.gz, .tar.bz2, or .tar.xz file?
- Is your documentation in PDF format?
- Have you attempted everything in Group 1? If not you will lose the marks for groups 2,3, and 4
- Have you attempted everything in Group 2? If not you will lose the marks for groups 2 and 3
- Have you attempted everything in Group 3? If not you will lose the marks for group 4
